

1st European Panel Products Symposium

9, 10 October 1997

Table of Contents

Session 1: Fundamental Properties

The nature and behaviour of wood-based composites <i>J.M. Dinwoodie</i>	1
The effect of compaction ratio on the dimensional recovery of wood particles pressed perpendicular to the grain <i>T. Adcock and M. Irle</i>	10
Advances in modelling mat formation and consolidation for wood composite panels <i>C. Dai, P. Hubert and S. Chen</i>	21
Microtomography of wood composite microstructure <i>S. Shaler</i>	28
The development and role of damage in wood-strand composites <i>M.P. Wolcott and W. Hua</i>	29
Characterisation of radiata pine HTMP fibres by electron, UV, and confocal laser scanning microscopy <i>A.G. McDonald, L.A. Donaldson, A.P. Singh, J. Alexander and K.D. Murton</i> ..	41

Session 2: Panel Properties

Effect of fiber surface and mechanical properties on the stiffness and strength of medium-density fiberboard <i>L. Groom, S. M. Shaler and L. Mott</i>	53
The effect of size and environment on the short and long term performance of a range of wood based panel products <i>P.W. Bonfield, J.M. Dinwoodie, J.S. Mundy, B.H. Paxton</i>	65
Panel performance - The results of an EC funded AIR project <i>V Kearley</i>	77
Understanding the fatigue and creep properties of MDF, OSB and chipboard using environmental scanning electron microscopy and X-ray densitometry <i>J Prichard, MP Ansell and PW Bonfield</i>	85
Internal bond, MOE, MOR and density profiles of C4M 18 mm thick particleboards <i>O. Moarcas and M. Irle</i>	100

Session 3: Raw Materials

Raw materials for panel products <i>E. Roffael</i>	113
The financial viability of UK grown fibre crops for the panel products industry <i>D.L. Sanders and D. M. Bruce</i>	114

Glass and carbon fibre fabrics, flax and Miscanthus as materials for reinforced particleboards <i>F. Troger and G. Wegener</i>	126
Assessment of the suitability of agro-based materials for panel products <i>J. Hague, C. Loxton, R. Quinney and N. Hobson</i>	136

Session 4: Process Technologies

Adhesive bond strength development in pressing operations: Some considerations <i>P.E. Humphrey</i>	145
Chemically modified wood for injection moulding <i>M. C. Timar, M.D. Mihai, M. Irle and K Maher</i>	156
Optimising the properties of straw based Particleboards <i>N. Jones, J. Hague</i>	166
MDF- Lightboards made from European Species. <i>C. Barbu, H. Resch</i>	175
Prospects for quality assurance in the German particleboard industry <i>A Steffen, K, Kruse and A. Ruf</i>	187
Optimisation of particleboard production by means of process modelling <i>K. Kruse, A. Steffen and H Thomen</i>	194
Looking into the "black box": The application of flow models to blowline blending in MDF fibres <i>D. Robson, M. Riepen, J. Hague, C. Loxton and R. Quinney</i>	203

Session 5: Resins and Additives

Sticking bits of wood together! <i>N. Pratt</i>	211
Analysis of formaldehyde condensation resins for the wood based panels industry: Status and new challenges. <i>M. Dunky</i>	217
Pinebark extract-based adhesives. A first approach in Portugal: Problems and perspectives <i>F. Jorge, C.P. Neto, M.Irle, M. Lawther, H. Gill, J.P de Jesus</i>	227
Wood-based panels produced with amino resins with formaldehyde release "like natural wood" <i>F. Wolf</i>	243
Distribution of MDI on particles and in particleboards <i>H. Roll</i>	250
