

# Table of Contents

## Keynote Address:

Panel Industry Struggles Through Economic Crises towards Bright Future for Carbon-Storing Panels <i>Kris Wijnendaele</i> .....	1
-----------------------------------------------------------------------------------------------------------------------------------	---

## Session 1: Sustainability and Sustainable Buildings

Sustainable Times – Setting a Benchmark for the Forest Products Industry for the 21 <sup>st</sup> Century <i>John Guerin</i> .....	9
Environmental Product Declaration of Wood-Based Panels: An Answer of Sustainability Building Requirements <i>C. Cornillier, P. Pacitto, C. Michaud and E. Vial</i> .....	23
Sustainability Tools Used in the U.K. for Construction Materials and Products <i>Dennis Jones</i> .....	35

## Session 2: Indoor Air Quality and Formaldehyde

Study of Formaldehyde Scavengers for Production of Low Formaldehyde Emission Particleboards <i>F. Silva, J. Pereira, J. Ferra, P. Mena, J.P. Liberal, F. Magalhães, A. Mendes, J. Martins and L. Carvalho</i> .....	47
Liquefied Wood as Formaldehyde Scavenger for Wood-Based Panels <i>S. Medved, B. Šega, M. Kunaver and M. Šernek</i> .....	61
An Investigation of the origin of Formaldehyde Found in Poplar Veneers <i>Baha Guezguez, Mark Irle and Christophe Belloncle</i> .....	71

## Session 3: Plywood and Laminated Products

Physical and Mechanical Properties and Burning Behaviour of Beech Plywood Made of Thermally Modified Veneers <i>Marek Grześkiewicz, Piotr Borysiuk and Waldemar Jaskółowski</i> .....	79
Microwave Assisted Drying of Radiata Pine Veneer <i>P. Vinden, G. Torgovnikov, W. Sayuti Pono, S. Przewloka, G. Harris and B. Ahmed</i> .....	89
Improvement of the Properties of Birch Plywood by Thermal Modification <i>V. Biziks, K. Zudrags, I. Andersone, B. Andersons, J. Grininsh and E. Sansonetti</i> .	99
Possibility of Using <i>Arundinaria alpina</i> Bamboo Panel Boards for Interior Applications <i>M.N. Lugoye, J.V. Tesha, C. Nyahumwa and S. Karlsson</i> .....	111
Enhancing the Environmental and Mechanical Properties of LVL <i>R. Marchal, C. Deschamps, J.-C. Butaud and F. Cottin</i> .....	125

## **Session 4: Lightweight Panels**

Kaurit <sup>®</sup> Light – The Solution for Lightweight Furniture <i>Maxim Peretolchin</i> .....	137
Perceptions of Austrian Furniture Customers of Lightweight Materials <i>Asta Eder and Peter Schwarzbauer</i> .....	145
The Continuous Production of Sandwich Panels with Paper Honeycomb Core for Furniture Applications <i>M. Britzke, J. Herold, C. Korn and A. Wagenführ</i> .....	155

## **Session 5: Machinery, Process Control and Machining**

Online Monitoring of the Processing of Strand Based Wood Composites: A Real Time Option for Optimised Production <i>Azzeddine Oudjehane</i> .....	165
High Energy and Maintenance Savings by Improving Tribology in Continuous MDF/OSB/PB Presses <i>Achim Offerman and Ulrich Jansen</i> .....	177
Effect of Formaldehyde Scavengers on the Machining of Particleboard <i>N. Garrido, J. Pereira, J. Martins, L. Carvalho, J. Mendes and C. Costa</i> .....	179
Automatic Physical and Aesthetic Repair of Wood Panels: An Intelligent Alternative to Automatic Down-Grading <i>Robert Massen, Marc O. Kuehn and Joerg Eberhardt</i> .....	191
State of the Art and Future Trends on Measuring Technologies for On-Line Control in the Wood-Based Panel Industry <i>Jörg Hasener</i> .....	201

## **Session 6: Wood-Based Panels – Recycling and Novel Feedstocks**

COST Action E49: Processes and Performance of Wood-Based Panels <i>Mark Irle</i> .....	211
MDF/HDF Production from Plantation Wood Species <i>T. Alpár, T. Fácán, I. Rác and G. Kátoli</i> .....	219
The Potential for Utilization of Corn Stalk in Medium Density Fiberboard <i>Abolfazl Kargarfard, Ahmad Jahan-Latibari and Amir Nourbakhsh</i> .....	231
Properties of Fiberboard Pulp Manufactures From Selected Types of Recovered Wood <i>Marcin Klimczewski, Danuta Nicewicz and Lech Danecki</i> .....	241
Recycling of UF-Bonded Fibreboards <i>E. Roffael, C. Behn, B. Dix and G. Bär</i> .....	253

## **Session 7: Resins**

Dimethoxyethanal-Derived Resins for Wood Based Panels <i>M. Properzi, S Wieland, F. Pichelin, A. Pizzi and C. Vu</i> .....	263
-------------------------------------------------------------------------------------------------------------------------------	-----

Evaluation of Adhesive Cure by ABES and IPATES for Two UF Resins <i>J. Ferra, M. Ohlmeyer, A.M. Mendes, M.R. Costa, L. Carvalho and F.D. Magalhães</i> .....	267
-----------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Urea Formaldehyde Particleboard Resins Prepared with Cornstarch and Mimosa Tannin <i>A. Moubarik, A. Pizzi, A. Allal, F. Charrier and B. Charrier</i> .....	277
----------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

## Poster Session

The Reduction of Formaldehyde Emission from Woo-Based Composite by Adding Volcanic Pozzolan as Green Building Materials <i>Sumin Kim</i> .....	287
---------------------------------------------------------------------------------------------------------------------------------------------------	-----

Microwave Surface Modification of Radiata Pine Peeler Cores: Technical and Cost Analyses <i>K. Sugiyanto, P. Vinden, G. Torgovnikov, S. Przewloka, G. Harris and B Ahmed</i> .....	291
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Influence of Thermal Modification of Chips on the Particleboards Resistance to <i>Coniophora puteana</i> (Schum., Fr.) Karst. and <i>Trametes versicolor</i> (L. ex Fr.) Pil. <i>Piotr Boruszewski, Piotr Borysiuk and Mariusz Mamiński</i> .....	297
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Chemical Degradation of Cell Wall Polymers Due to Industrial HDF Fibre Production <i>Martin Weigl, Susanne Vrchoticky and Thomas Ters</i> .....	301
----------------------------------------------------------------------------------------------------------------------------------------------------	-----

Simulation of Recovered Wood Samples <i>A. Bouslamti, C. Belloncle, M. Irle, V. Salvador, M. Bondu and B. Caron</i> .....	303
------------------------------------------------------------------------------------------------------------------------------	-----

Innovative Processing of Beetle Killed Pine into Strand Based Wood Composites <i>Azzeddine Oudjehane</i> .....	307
-------------------------------------------------------------------------------------------------------------------	-----

Investigation on Utilization of Poplar Branches and Small Diameter Residues in Particleboard Production <i>Ahmad Jahan-Latibari, Taher Eskandarlee and Ahmad Nowrouzi</i> .....	313
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Production of Cement-Bonded Particleboard from Poplar <i>T. Alpár and I. Rác</i> .....	319
-------------------------------------------------------------------------------------------	-----

Termites Attack Resistance of Thermoplastic-Bonded Particleboards <i>P. Borysiuk, P. Boruszewski and M. Mamiński</i> .....	327
-------------------------------------------------------------------------------------------------------------------------------	-----
